

Support 'Bring Your Own Operator' with Seamless Number Inventory Management

Telesmart.io

Serve growing demand for numbers across multiple markets with a single API-enabled platform

Bring Your Own Operator models like Operator Connect are increasing demand for simple and seamless number inventory management solutions. Operators that are enabling Teams, Zoom or any other calling platform need connect enterprises and assign phone numbers to users.

The Telesmart platform enables operators to manage all of their numbers across markets in one platform and access inventory on-demand instead of holding unused numbers. Operators can seamlessly integrate the platform into its existing systems with APIs and make it easy to monetise numbers while serving enterprise demand for Teams, Zoom and other calling platforms.

Benefits

Bring Your Own Numbers

On-line provisioning for your inventory, add existing/new providers, customers and enable immediate revenue generation opportunities.

API integration for customers and suppliers

Seamlessly integrate widgets and features for specific customer needs and compliance. Easily share inventory with ecosystem partners.

Simple & Seamless Model

Our platform is designed to be easy to adopt, quick to deploy, and simple to manage.

Optimised User Experience

We focus on removing complexity to give users an e-commerce experience when procuring number and messaging services.

A Risk-Free Revenue Opportunity

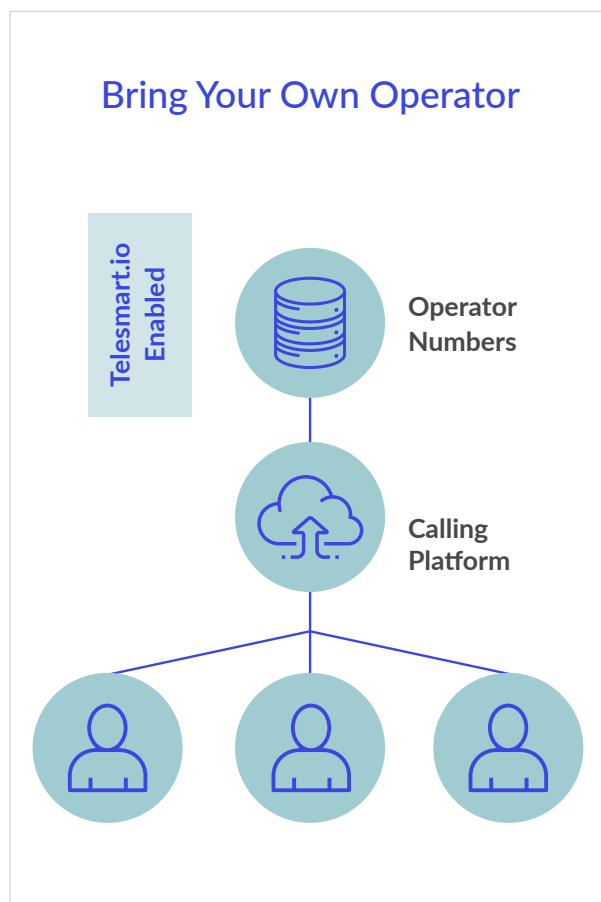

Users can rapidly monetise the growing opportunity in Bring Your Own Operator with no upfront costs.

A Trusted Platform

Our platform is built for users by users with decades of experience in serving the largest consumers of global numbers.

Dynamic Provider Status

When you use Telesmart.io, you don't need to hold expensive inventory. You can access numbers from partners as and when you need them.
